

Welcome to Atlas

Atlas is a leading provider of documentation and project delivery services to architectural, engineering and construction professionals. Since 1998 we have delivered quality documentation and data models using all major CAD and BIM platforms, giving our clients more time to manage the design process.

With a presence in the UK, Middle East, Vietnam and Australia, we are able to offer our clients reduced project risk and increased productivity by offering a flexible, scalable and skilled resource pool. Atlas uses the latest technology to seamlessly support project teams according to programmed demands. Having collaborated with 112 clients in 8 countries and in the past three years delivered over 70 major projects, we remain the trusted delivery partner to clients around the world.

'The operation run by Atlas is not just a "documentation house"; they have the capacity to collaborate and add value in all stages of a design, and they have the resources and software that is also capable of very sophisticated visual communication of concepts, ideas and designs. It is now fully understood and proven by research, that trans-disciplinary design is the most effective way of facilitating and maintaining innovation in design.'

Tim Shannon—MD of Hassell 1994—2009

WHAT WE DO

Atlas offers our clients the ability to focus on what they do best – innovative thinking and problem solving.

We work through all stages of construction including Design Development and Construction Documentation.

We use all major software platforms in accordance with the in-house standards and protocols of our clients:

- + Architects
- + Master planners & urban designers
- + Structural & civil engineers, M&E engineers
- + Contractors
- + Facilities managers
- + Surveyors and other consultants

Our services include:

Architectural

- + Working drawings
- + Design development
- + CGI
- + Master planning support
- + Construction documentation
- + Schedules
- + Multidisciplinary co-ordination

Engineering (Structural, MEP)

Our structural team offers design, calculation & detailing services across all major structural systems and materials:

- + Timber, structural insulated panels & oak frame
- + Masonry
- + Reinforced concrete
- + Steelwork

BIM

- + Execution plans
- + Model creation, hosting and management
- + Point cloud conversion
- + Design coordination and clash detection
- + Construction sequencing and scheduling
- + Material quantities

HOW WE WORK

Atlas has an innovative way of working and uses technology to seamlessly form part of the design delivery team.

Technology

- + All major CAD software
- + Reliable document exchange platforms
- + Effective communication tools

People

- + Expatriate team: qualified architects and engineers with extensive experience and knowledge of standards across all our markets & sectors
- + Vietnam operation team: experienced architects & engineers with excellent documentation skills

We deliver projects using our ISO9001 approved process.

HOW YOU BENEFIT

The Atlas business model delivers time saving, quality workmanship and specialist resources. This generates value for our clients through:

- + Improved quality and consistency of drawings
- + Increased ability to bid for larger projects
- + Ability to fix and manage costs
- + Improved deadline achievement and programme delivery
- + Enhanced resource and skills management
- + Leading technological capability
